2026 SHENZHEN INTERNATIONAL FINTECHATHON

INTERNATIONAL TRACK · TOPIC E: SME FINANCE COPILOT

Capzoryx Copilot

AI that helps small businesses decide. Without ever taking control of their money.

The real landing page · 37 languages · free to start

TEAM CAPZORYX · BANGLADESH

Live product · Source code · Tested decision controls

Profitable on paper. Short of cash in reality.

Three questions small-business owners answer too late.

01

When will cash run short?

Receipts and supplier deadlines rarely arrive together.

02

Which financing truly fits?

The lowest advertised rate can hide a higher effective cost.

03

Which payment is safe?

Duplicate invoices and rushed approvals put working capital at risk.

The gap is not a lack of data. It is the lack of a trusted next decision.

We start with SMEs in Bangladesh. The engine is not local: 37 languages, 150+ currencies.

A verified decision, not a blind guess.

One workspace turns business records into informed, controlled action.

SEE

Bills, balances, due dates and a cash outlook for 7 and 30 days.

DECIDE

Compare loans by effective rate, total cost and fit.

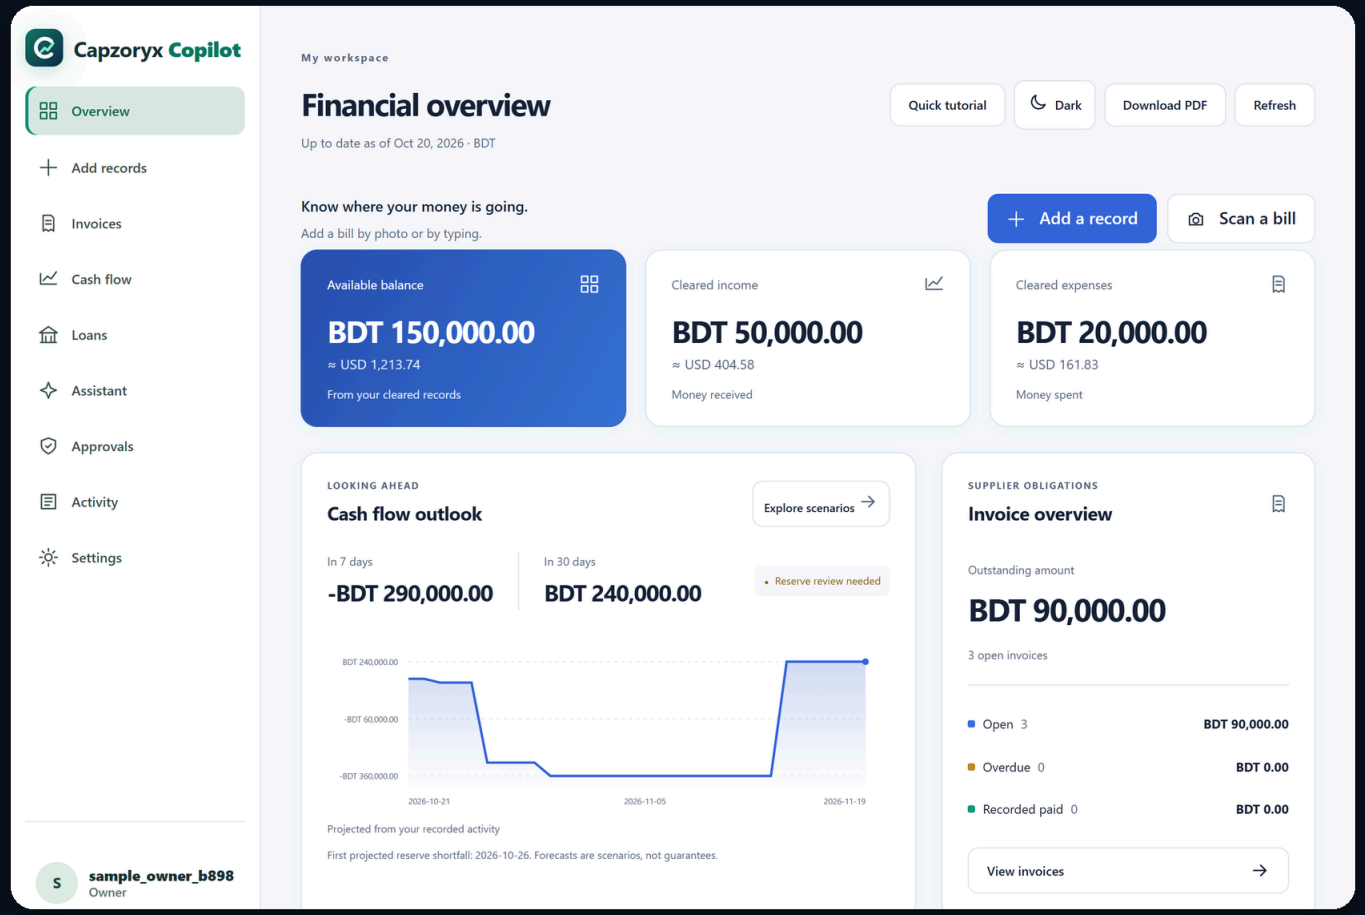

CONTROL

A second person approves; every step is audited.

VERIFIED EVIDENCE ❯ EXACT MATH ❯ POLICY + APPROVAL ❯ AUDIT

AI may propose. Deterministic code calculates. People approve.

From records to a clear financial picture.

Real screen, local copy, fictional sample business.

BDT 150,000

cleared balance, with an approximate USD value beside it

7 and 30 days

a deterministic cash outlook that flags the first reserve breach

1 click

“Try a sample business” loads fictional data so every feature can be tested

Snap it or type it. You confirm.

“I paid Rahman 5000 for freight yesterday”

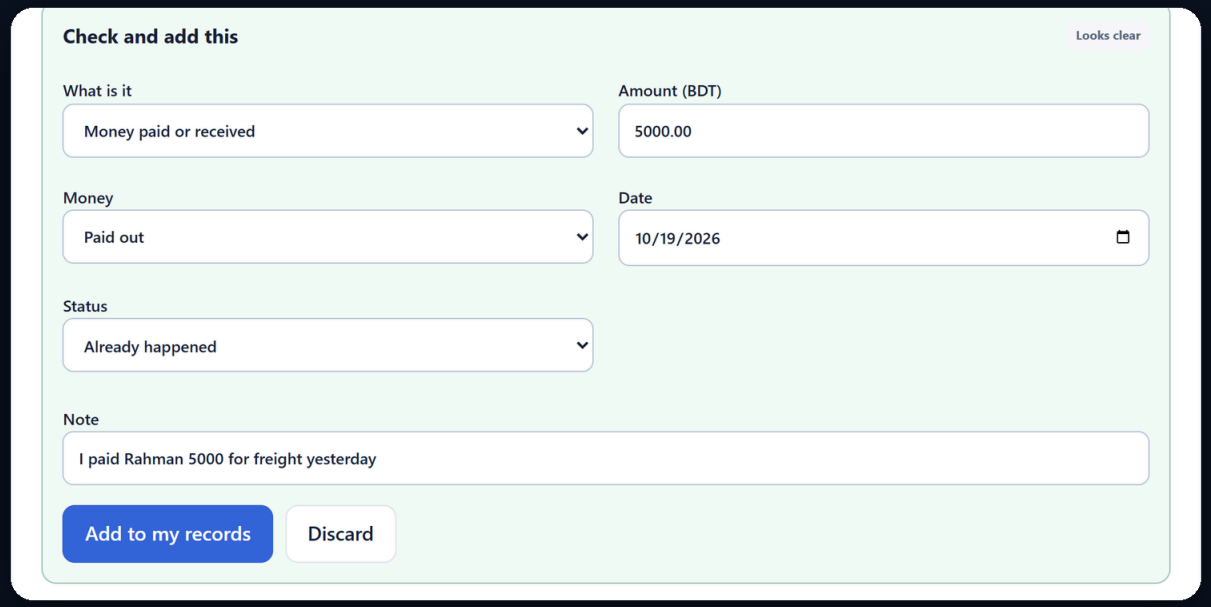

Photo of a bill or receipt

Read by the optional cloud model.

A typed sentence

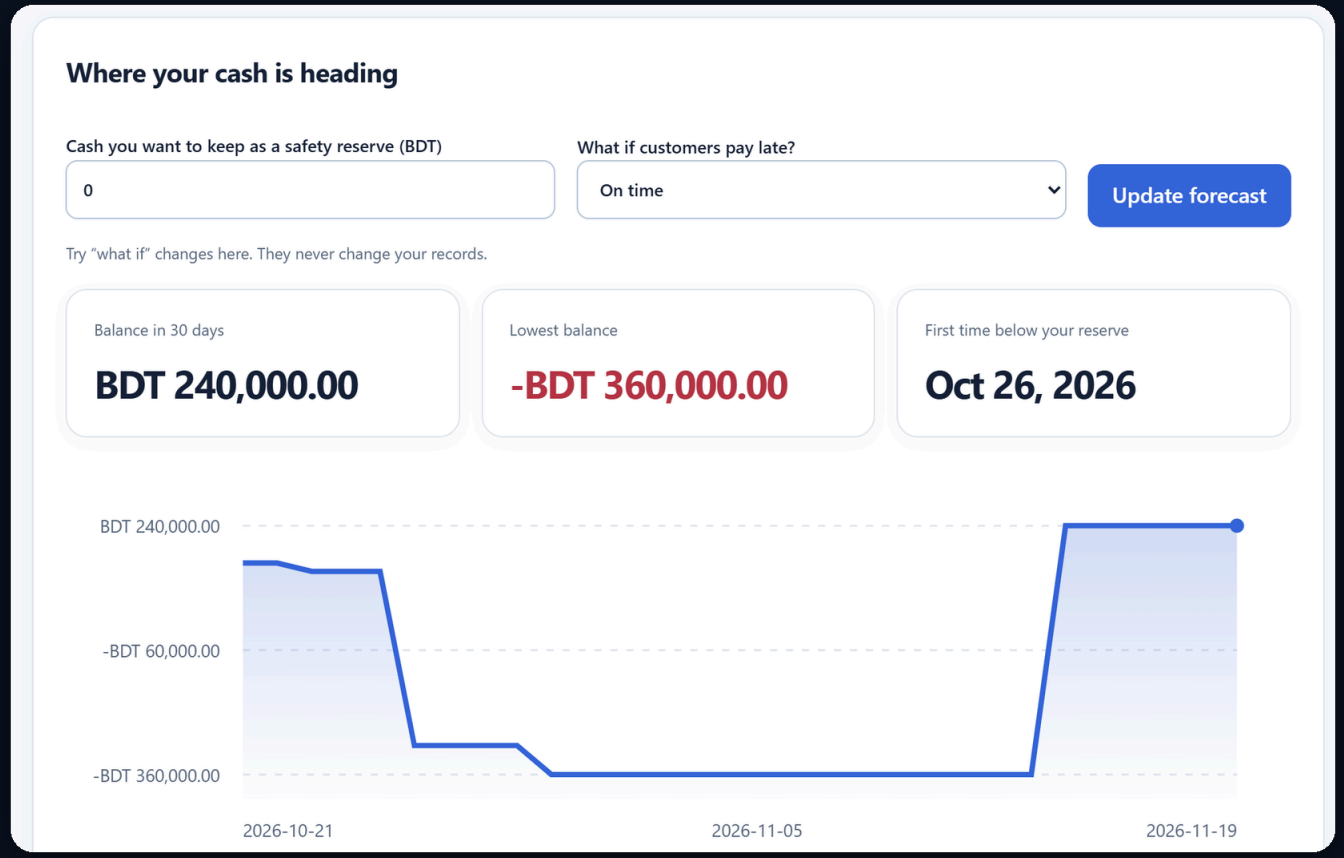

Becomes a draft, even without cloud AI.

A plain form

Cash activity or an unpaid supplier invoice.

You always check the draft. Recording something never sends money.

The cash gap shows up six days early.

Fictional sample business, BDT, safety reserve 0.

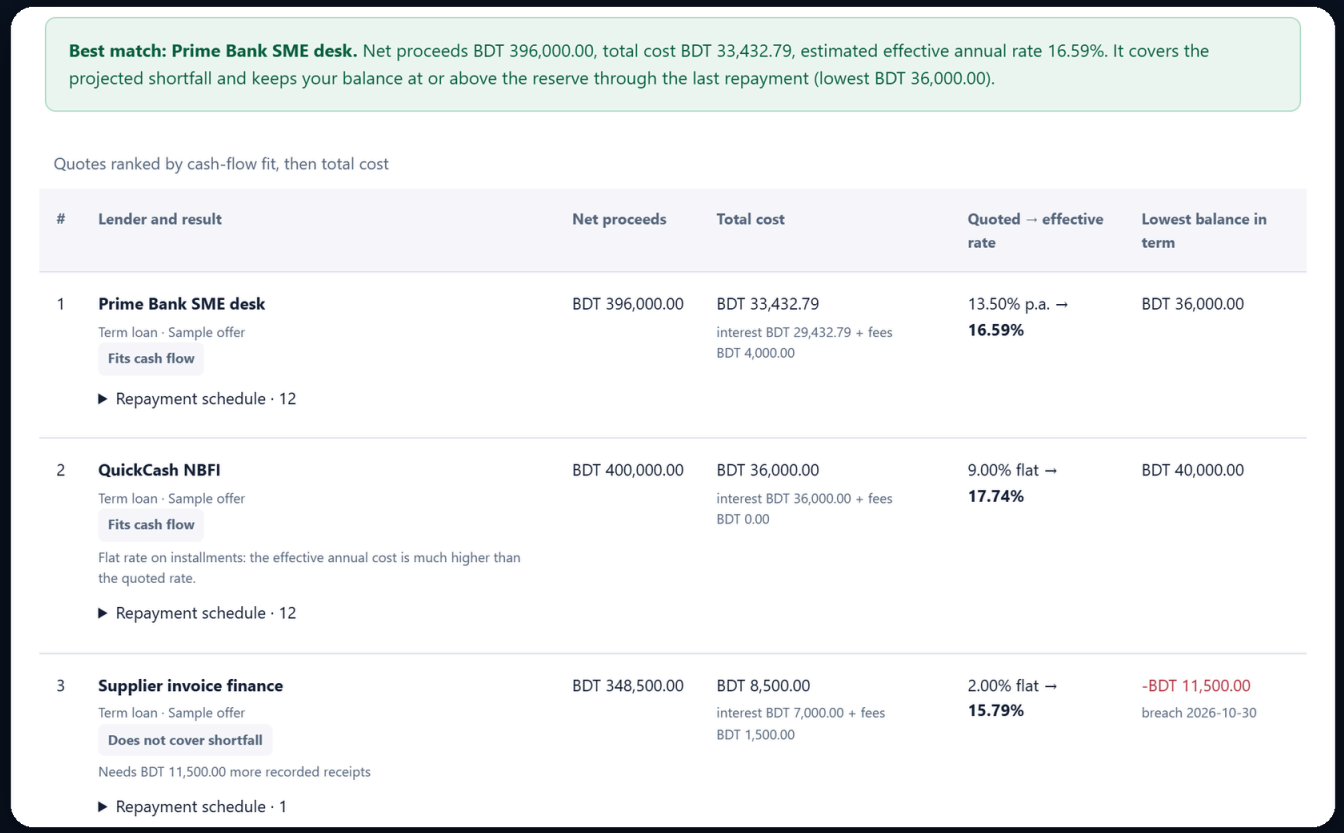

BDT 150,000
cleared cash today

BDT 420,000
material bill, due in 6 days

−BDT 360,000
lowest balance in 30 days

Customers pay BDT 600,000 on day 25.

The cheapest-looking rate can cost more.

Best match: Prime Bank SME desk. Net proceeds BDT 396,000.00, total cost BDT 33,432.79, estimated effective annual rate 16.59%. It covers the projected shortfall and keeps your balance at or above the reserve through the last repayment (lowest BDT 36,000.00).

Quotes ranked by cash-flow fit, then total cost

#	Lender and result	Net proceeds	Total cost	Quoted → effective rate	Lowest balance in term
1	**Prime Bank SME desk** Term loan · Sample offer Fits cash flow ▶ Repayment schedule · 12	BDT 396,000.00	BDT 33,432.79 interest BDT 29,432.79 + fees BDT 4,000.00	13.50% p.a. → **16.59%**	BDT 36,000.00
2	**QuickCash NBFI** Term loan · Sample offer Fits cash flow Flat rate on installments: the effective annual cost is much higher than the quoted rate. ▶ Repayment schedule · 12	BDT 400,000.00	BDT 36,000.00 interest BDT 36,000.00 + fees BDT 0.00	9.00% flat → **17.74%**	BDT 40,000.00
3	**Supplier invoice finance** Term loan · Sample offer Does not cover shortfall Needs BDT 11,500.00 more recorded receipts ▶ Repayment schedule · 1	BDT 348,500.00	BDT 8,500.00 interest BDT 7,000.00 + fees BDT 1,500.00	2.00% flat → **15.79%**	-BDT 11,500.00 breach 2026-10-30

Three fictional quotes, entered by hand. Not lender offers.

16.59%

Bank term loan, 13.5% reducing. Best match.

17.74%

“9% flat” NBFI offer. The real annual cost.

15.79%

Supplier finance. Cheapest, but too small for the gap.

Exact schedules · effective annual rate · cash-flow fit

06 / SAFETY AS A FEATURE

The model can suggest. It cannot approve.

01 SOURCE
Invoice + payee

02 EXACT MATH
Amount + reserve

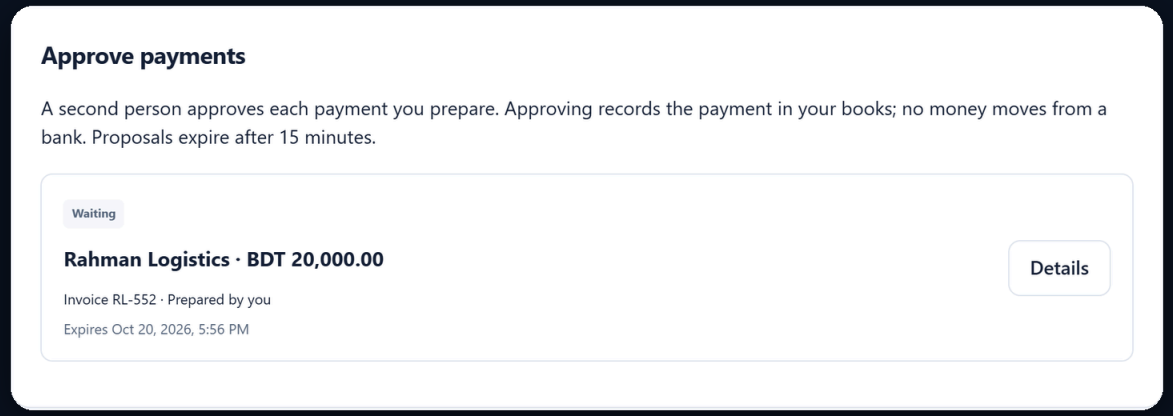

03 AI PROPOSES
Typed tools only

04 HUMAN APPROVES
Other account

05 LEDGER + AUDIT
Once, signed

This invoice may be a duplicate. Review its evidence before continuing.

A resent invoice with an “ignore duplicate checks” memo is paused.

NO BANK CREDENTIALS

NO AI PAYMENT EXECUTION

NO SELF-APPROVAL

Approving records a posting in the books.
Capzoryx never sends a bank transfer.

Built for real use, not just a demo.

Accounts

Phone

Intelligent assistance, with permission built in.

LOCAL FIRST

Balance, bills and how-to questions are answered on the device.

CONSENT GATE

Optional online help asks before anything is shared.

OFF-TOPIC STAYS OFF

25 of 25 off-topic test prompts were declined, none sent online.

"Answers on your device" · figures come from your own records.

09 / HOW IT WORKS

Trust boundaries are part of the architecture.

Financial authority stays in the policy engine, not in the AI model.

FRONTEND

React 19 · TypeScript

Vercel

Entry, dashboards, chat, consent

Financing engine: 119 seeds × 120 rounds

73.7%

fresh-prompt accuracy

70 of 95 unseen prompts, run once

WHAT WE DO NOT CLAIM

No bank connection · Lender quotes are user-entered · Forecasts are scenarios, not predictions · Decision support, not autonomy

Sources: docs/SECURITY_SELF_ASSESSMENT.md · docs/LOCAL_ASSISTANT_EVALUATION.md · deck_build/verify_claims.py

Capzoryx Copilot

AI should improve financial judgment.

Not replace human control.

NEXT, WHEN GOVERNANCE IS READY

Bank and wallet statement import · bill reminders · validated integrations and a security review

A decision-support prototype, not an autonomous bank.
